DETAILED ACTION

Response to Amendment

The Amendment, filed on 6/22/2005, has been entered and acknowledged by the Examiner.

Cancellation of claims 2, 3, and 6-9 has been entered.

Allowable Subject Matter

Claims 1, 4, and 5 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of a gas discharge panel including a protective film with a voltage reducing compound where, the voltage reducing compound is one of the following compounds: 1-propanol, diethylene glycol monobutyl ether acetate, methane, a-terpineol and 1-butanol. Sakurai ('616) discloses the use of a-terpineol as a solvent in the intermediate step of applying the MgO paste, however there is nothing to suggest that the solvent remains in the final product after drying and baking.

Regarding claims 4 and 5, claims 4 and 5 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
